

# OFF-GRID SYSTEM

Off-grid homes rely on alternative Renewable Energy sources such as the sun and the wind.

When a building is off the grid, it means it has no connection or relationship with a utility grid and all the power it uses comes from a source that it generates on its own (Atma Nirbhar)

**Suitable for a consumer who do not grid connectivity**

## Features

Maximized Solar Usages

**In Built smart battery Management system for prolonged battery- life**

Digital display & 5 Years Battery and inverter warranty

**Self-protecting active fault monitoring unit for safe operations**

25 years of Solar module Performance warranty

## Advantage

Say Goodbye to black-outs

**Any-time Power**

Low Dependence on erratic grid

**Run Critical loads on Solar**

Trusted, Dependable and Long Lasting System

**Green Energy, Clean Energy**
